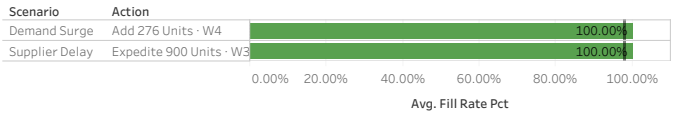
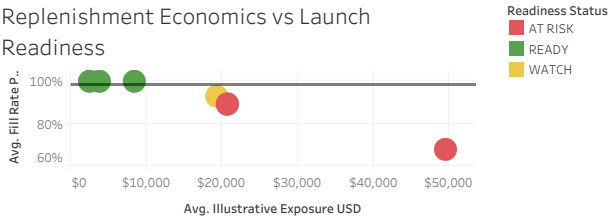
Decision Intelligence | Supply Actions, Economic Exposure & Launch Readiness

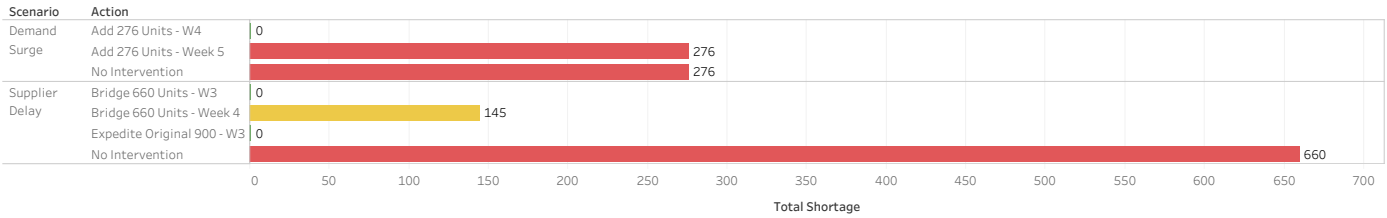
Recommended Supply Actions



Replenishment Economics vs Launch Readiness



Residual Shortage Exposure by Replenishment Action



Launch-Ready Replenishment Options | Operational & Economic Comparison

Scenario	Action	Exposure Reduction vs No Action USD	Fill Rate Pct.	Illustrative Exposure USD	Total Shortage
Demand Surge	Add 276 Units - W4	$16,888	100%	$3,812	0
Supplier Delay	Bridge 660 Units - W3	$41,080	100%	$8,420	0
	Expedite Original 900 - W3	$47,000	100%	$2,500	0

EXECUTIVE DECISION SUMMARY

Demand Surge: Adding 276 units in Week 4 restores 100% modeled fulfillment, eliminates 276 shortage units, and reduces illustrative economic exposure by $16,888.

Supplier Delay: Expediting the original shipment restores 100% modeled fulfillment with $2,500 in illustrative exposure, compared with $8,420 for the Week 3 bridge alternative.

Recommendation: Prioritize interventions satisfying the 98% fill-rate and zero-shortage-week requirements while evaluating economic exposure and execution feasibility.

Results reflect hypothetical planning scenarios, not realized financial..
